VVB RFT INSTRUCTIONS FOR TESTING ROTARY INDICATOR (2pp; German; [REDACTED] document distributed on 30 January 1953)

25X1A

25X1X

25X1X

25X1A The attached document concerns a rotary indicator for a gyrocompass installation. Twenty of these indicators were delivered by the Askania Works, Teltow.

This document is a photostat copy of a set of instructions, dated 21 June 1952 and prepared by the VVB RFT (Administration of People-Owned Enterprises for Radio and Telecommunications), for testing a rotary indicator, type 70/80/4. The instructions pertain to the testing of the individual parts as well as to the testing of insulation resistance, maximum moment of rotation (Drehmoment) and other properties of the instrument. Parts of this document are illegible.
